there so indulged, and have at the same time pitted up fearful evidences of the amount of Western induletedness which must be paid.—With this indulgence in what has been indisputably costly, and quite as indisputably barbaric, though "fashionable," according to the canons of society in which evidences of wealth are accepted as evidences of respectability, have come the unavoidable soils which follows in the train. Osses, a minute fraction of Kansess managed to get copies of it, and with these it creased no disturbance whatever. Fre-Slavery on both sides of the Missouri read that "the Administration recognizes the authority of the Eerstoorial Legislature." "Of course "said Fre-Slavery" shat did we elect them for?" Free Slate read the same thing and indulged in about the same style of coment. "Recognizes. O certainly." When the penumbra of the new Administration uppeared in Lawrence accompanied by a Border Ruffian in steeple books, the citizens greeted him pleasantly and called him "Governor." They received a pleasant specing in return; i Gov. Robinson made up a companioo, and it was announced that Mr. Stanton out of the same three species of the citizens in the evoning. My impression of Mr. Stanton, derived from some little intercents previous to his speech, was not unpleasant. The impression derived from the speech tisted was far from gratifying. I happened to be present at the tea party mentioned above, and an onliang confidential transpired, and nothing but contrest and good feeling manifested itself, I shall take occasion to report some parts of the conversation to which I was a listener. I do this more especially be cause it presents a brief summing up of the positions of two parties in Kanasa, and hints estimated itself, I shall take occasion to report some parts of the conversation to which I was a listener. I do this more especially be cause it presents a brief summing up of the positions of two parties in Kanasa, and hints estimated the stanton of friend frem Lecompitor, one General McLean, who causally informed as diath the led the advance guard of the 2,800 braves who marched consord Lawrence sometime last summer:

McLean—Whenever the Free State party in Kanasa convince me that they have an actual majority of the residents of the Territory over the National Democrate.

McLean—National Democrate is any man from the North or the South, from the East or the West whose faith is selectly benunciated in the Cincinnat come the unavoidable sells swhich follows in iterais. There is a general neglect of productive labor. The rewards offered latterly to trade and speculation, have drawn too many thousands out of the productive classes. The man, who by the purchase of a laid warrant, the entry and subsequent sale of a quarter sociou of prairie, all accomplished within a mostle, could "make" a handred, or five hundred dollars by his sharpness, has had few intered dollars by his sharpness, has had few inmonth, could "make" a hundred, or live hun-dred dollars by his sharpness, has had few in-docements to weary himself by continued phys-ical toil. Luxury has increased among the the people until men have been forced to more the people until man have been forced to more uncertain but possibly more productive pursuits than agriculture, to supply what their supposed necessities have demanded. In too many cases their needs have demanded. In too many cases their needs have been met only by the imposition of fletitious values on what they possessed, or by an extension of credits to which they were not entitled. So, with a deficiency, in the labor manicel which our prices current make painfully apparent, backed up by a period of universal similation, by a flush condition in the money centres of the world, by immense and constantly increasing railroad operations, the speculation has gone on, until we do not errow when we say that it is to-day absorbing all other pursuits. Indeed, under modified conditions

and saving limitations, we are again recaneting the events of 1835-6-7. Land enough has been thrown into the market to supply the wants of half a score of years, were not another acre in the mean time to be put in market by the Gov-erament. The supply has largely outstripped the demand, and, what is anomalous, as the markits by increased the velocity has been considered.

Milem—That is all very well; but I prefer a name which applies equally to all sections of the constry—something National! By the National Democracy of Kansas, I understand that party which proposes no interference with the rights of the South.

Robusson—But my dear sir, I propose no interference with the rights of the South, and yet 7 shall object to anybody's fustening ms to the Cincinnati Platform.

Milem—I think the distinction is plain enough. The National Democracy have invited. Journal of May 9th, says that we heastly tragi-cal scene occurred" at Hagurstows. Maleon-Ru they will when the occasion comes. It was found necessary on the part of the Legislature to reserve this right.

Stanton-Reserve! No such right ever be commer Accepter. No such right ever belonged to any Legislature under the sun. Nonsense:

\*\*McLon\*\*\*—Nonsense or not; we have the right of calling out militia and intend to exercise it whenever we find it necessary; that's all!

\*\*Stastas\*\*—O, you are ullogether mistaken, &c. I need not follow this pleasant little expression of views any farther. Our party afformed to the Uncinnent House and listened to Mr. Stanton's speech. I have already made this letter longer than I had intended. The conversation above reported is eminently suggestive and I think speaks for itself. If it should meet the eyes of any of the participants they will recognize its correctness in all essential particulars, and if I have set down anght in malice, I trust the Tribuse will be open for the amplest correction to the lujured party. Messes, Stanton and McLean having expressed their views publicly and without reserve in the streets of Lawrence took before and after this dialogue, it will not be deemed any breach of confidence that come portion of those views should take on the illumination of the types.
